REBATE OPPORTUNITIES – MINIMUM OF 2 UPGRADES REQUIRED

Upgrade #1 - Attic Insulation	Maximum Rebate
Attic: Increase attic insulation to at least R-50 from R-12 or less	\$1,500
Attic: Increase attic insulation to at least R-50 from greater than R-12 up to R-25	\$1,200
Attic: Increase attic insulation to at least R-50 from greater than R-25 up to R-35	\$900
Cathedral Ceiling / Flat Roof: Increase cathedral roof insulation to at least R-28 from R-25 or less	\$780
Cathedral Ceiling / Flat Roof: Increase cathedral roof insulation to at least R-20 from R-12 or less	\$780

Minimum 50% to be insulated. Rebate amount will be prorated based on the total % of ceiling area insulated. Total rebate amount for any combination of attic, cathedral ceiling and flat roof insulation cannot exceed \$1,500.

Upgrade #2 - Basement Insulation	Maximum Rebate ³
Basement Wall¹: Add insulation greater than R-22 to 100% of the basement wall area	\$1,500
Basement Wall¹: Add insulation of R-10 up to R-22 to 100% of the basement wall area	\$900
Basement Slab: Insulate at least 50% of the entire basement slab area to add a minimum of R-3.5	\$500
Crawl Space Wall¹: Add insulation greater than R-22 to 100% of the exterior crawl space wall	\$1,200
Crawl Space Wall¹: Add insulation of R-10 up to R-22 to 100% of the exterior crawl space wall	\$600
Crawl Space Ceiling: Add insulation greater than R-24 to 100% of the crawl space ceiling	\$1,200
Foundation Header²: Insulate at least 80% of the entire foundation header area to add a minimum of R-20	\$300

¹Minimum 20% to be insulated and rebate amount will be prorated based on the total % of walls insulated. If insulating both basement walls and crawl space walls, the maximum rebate for both areas is \$1,500.

²Foundation header can be a basement header, a crawl space header, or a combination of both. Foundation headers are not eligible to count as a qualified measure but can qualify for a rebate when done in combination with crawl space wall or basement wall insulation. ³Maximum rebate for any combination of basement insulation cannot exceed \$2,300.

Upgrade #3 - Exterior Wall Insulation	Maximum Rebate
Exterior Wall: Add insulation greater than R-20 to 100% of the exterior wall area	\$3,600
Exterior Wall: Add insulation greater than R-12 up to R-20 to 100% of the exterior wall area	\$2,100
Exterior Wall: Add insulation of R-7.5 to R-12 up to 100% of the exterior wall area	\$1,200

Minimum 20% to be insulated. Rebate amount will be prorated based on the total % wall area insulated. Total rebate cannot exceed \$3600.

Upgrade #4 - Exposed Floor Insulation	Maximum Rebate
Exposed Floor: Add insulation of at least R-20 to the entire exposed floor area	\$300

Minimum area of 11 square meters or 120 square feet must be insulated.

Upgrade #5 - Air Sealing	Maximum Rebate
Air Sealing: Achieve the target in your Renovation Upgrade Report	\$200
Air Sealing: Achieve 10% or more above the base target in your Renovation Upgrade Report	\$250

Renovation Upgrade Reports (RUR) will be provided by your energy advisor after completion of your energy audit. Receipts are ONLY required for air sealing if a heat pump water heater is being claimed as the second measure.

Upgrade #6 - Windows / Doors	Maximum Rebate
Windows/Doors: For each window, door, skylight or sliding door replaced with an ENERGY STAR certified model	\$100 / rough opening

A minimum of 3 windows, or 1 door, or 1 skylight, or 1 sliding door are required to be upgraded to qualify for a rebate and will count as 1 qualified measure. For clarity, replacing only 1 or 2 windows with an ENERGY STAR certified model will NOT count as a qualified measure, or qualify for a rebate. Replacing already existing ENERGY STAR certified model windows/doors will also not qualify.

Upgrade #7 - Water Heating	Maximum Rebate
Water Heating: Replace your domestic water heater with an ENERGY STAR certified heat pump water heater	\$500

Installed item must be listed on the Natural Resources Canada (NRCAN) list of eligible products. Please visit their website for a complete list.
